Bomford Turner

Proven Landscape Technology

They say there is no substitute for experience, we at Bomford agree. Pioneering innovative design in engineering since the late 1800's, Bomford have always been the leaders in their field.

Innovation And Durability

From developing labour saving road building machinery after the Napoleonic wars to the inception and development of the first Arm Mowers in the late 40's, right up to the present day state-of-the-art machinery, we live and breath innovation.

Our latest product catalogue showcases our full range of vegetation control products that are renowned for their strength in engineering and product durability.

On-Going Product Development

At Bomford, we are always looking to develop our product range and respond to the demands of our customers. Whether this means expanding the range of our impressive Flailbot machines, introducing a telescopic version of the popular Buzzard arm mower or offering a Flex option on our Dyna-Drive cultivator, you can sure we won't be standing still when it comes to finding the right solutions.

Microklippa

The Microklippa is very popular with estate managers and horticulturists who admire the Microklippa's fine cutting capabilities when hedge trimming and the versatility of the right or left hand cutting.

The Microklippa can be used on a range of power units from small compact tractors to small pivot steer loaders, in conjunction with a front mount kit.

Key Features

- 3.2m or 3.5m reach
- Left or right hand cutting (swing over capability)
- Cable or Electronic Proportional Controlled (EPC) options
- Front mount option and 16-22 litres per minute

Want to know more about the Microklippa range?

Cutter bar
Ideal for trimming ornamental and standard hedgerows up to 20mm thick.

Auto swingover latch
To operate fully extend second arm, allowing single operation from left to right.

Gravity breakout
To protect tractor and machine when cutting.

Wren

Compact yet powerful, the Wren is the latest addition to the range of arm mowers from Bomford Turner and offers an excellent entry-level solution to your landscaping maintenance needs.

Fitted with twin pumps and fully independent hydraulics, the Wren can operate a range of different attachments.

Key Features

- 3.5m reach
- Left or right hand cutting option
- Cable control
- Mechanical breakout
- Cutter bar option

Robin

The Robin is a professional compact Arm mower - perfect for amenity and estate use and also a firm favourite with small farmers as it can verge mow or hedge trim just as well as some of our larger models.

The Robin has many variants, and is available as front mount, along with small wheel loader and skid steer options.

Key Features

- 3.4m or 4.3m reach
- Parallel linkage as standard
- Hydraulic breakout on second arm standard
- End drive cutting head or cutter bar
- Electronic Proportional Controlled (EPC) optional
- Front mount option
- Low friction cable control

Want to know more about the Robin range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Hydraulic breakout

Fitted as standard this protects both machine and driver.

Fully independent hydraulics

For continuous use. Twin pumps with separate oil tank.

Front mounted option

Fitting kits available for various prime movers. Contact for details.

Reach options

There are 2 reach options available with this machine - 3.4m and 4.3m.

Raven

The Raven is a rear mounted Arm mower designed to meet the demands of smaller agricultural, horticultural, landscape & amenity customers. The rugged design ensures excellent performance for a small, compact machine and is suitable for any tractor over 40HP.

With a choice of 4.0m or 4.7m reach, and the familiar cable lever control the Raven can also be fitted with the popular LPH "Low Pressure Hydraulic" or EPP "Electronic Proportional Control" Joysticks, which gives proportional control of the arm and switch control of the head angle. Arm float functions are available via buttons on the rear of the stick allowing ultimate control when operating the machinery, whether hedge cutting or verge mowing.

Key Features

- Choice of 4.0m or 4.7m reach
- Direct drive cutting head or cutter bar
- Cable Control with options for LPH & EPP
- Chain stabiliser kit
- Tubular 3 point linkage option
- Choice of flails

Want to know more about the Raven range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Rugged design
With oversized arms this machine is perfect for cutting grass.

Integral tank mainframe
Reduced weight makes the Raven compatible with smaller tractors.

Independent hydraulics
For continuous use. Twin pumps with separate oil tank.

X	1.0m / 3.4m	1.0m / 3.4m
Y	1.34m / 4'7"	1.34m / 4'7"

Osprey

The Osprey is the perfect choice for the small scale and co-operative agricultural markets. This economic entry level machine would also be of interest to sports and amenity managers.

With a choice of 4.5m or 5.0m reach, with an impressive 110 degrees of power slew and hydraulic breakout as standard, the Osprey is ideal where access is a challenge to the operator. The mainframe of the machine is close coupled to the tractor and this allows the machine to be fitted to smaller tractors than most other competitor models on the market.

Arm attachments can include a choice of flail heads for control of grass, hedges and light brush along with the Sheartrim cutter bar or Pro-Saw attachments for control of heavier brush.

Key Features

- 4.5 or 5.0m reach
- Choice of heads
- Low friction cable, LPH or EPP controls
- Three point linkage mounted
- 110° power slew
- Hydraulic breakout protection

Want to know more about the Osprey range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Hydraulic slew & breakout
110° of slew and hydraulic breakout makes the Osprey very adaptable.

Secure adjustable parking stands
For uncoupling the machine on a variety of surfaces safely.

Adjustable cowl linkage
Giving a larger range of head movement.

Kestrel Evo 'E'

The Kestrel Evo 'E' hedge trimmer and verge mower, with a 5m reach and a choice of flail heads or a 1.5m sheartrim cutterbar, is perfect for the farmer who needs professional features and robust design, offering real value for money.

A well designed, and cost effective machine, with mechanical breakout and cable controls as standard, the Kestrel Evo 'E' is the perfect model for small scale farmers and infrequent users. Very popular with dairy farmers who wish to maintain stock boundary hedges and water courses with hassle free operation and economic cost.

A choice of flail heads for control of grass, hedges and light brush. Upgrade options to the Pro-Trim series of cutting head and heavy duty Truecut flail are available.

Key Features

- 5m reach options
- Choice of flail heads or 1.5m cutter bar
- Twin pump independent hydraulics
- Cat 11 three point linkage mounted
- Non parallel or parallel linkage options
- Mechanical breakout protection

Kestrel Evo 'S'

The Kestrel Evo 'S' has been designed to provide significant reach for farmers who need to keep weight in mind whilst retaining the versatile features of a more expensive machine.

These features include integral road lighting, tubular 3 point linkage and power slew with hydraulic breakout.

Key Features

- 5m or 5.7m reach
- Parallel arm option
- Front mount option
- Choice of flails, heads and cutter bars
- Power slew
- Forward arm option

Kestrel Evo Power Plus

Introducing the Kestrel S 5.7P Power Plus. This new model release of the Kestrel now takes this popular reach arm mower to a new level with increased power and additional features.

These features include integral road lighting, tubular 3 point linkage and power slew with hydraulic breakout.

Key Features

- 5.7m reach
- 60hp gear pumps
- Parallel arm standard
- Choice of flails, heads and cutter bars
- Power slew
- Steel hose covers standard

Want to know more about the Kestrel Evo Power Plus range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Power slew and hydraulic breakout
For driver and machine safety.

Steel hose covers
Adding additional protection to drive motor hoses.

Road lights & oil cooler
Fitted as standard.

Hawk Evo Power Plus

The Hawk Evo Power Plus is perfect for contractors and municipal environments.

These features include integral road lighting, tubular 3 point linkage and power slew with hydraulic breakout.

Key Features

- 6.5m and 7.0m reach options
- Parallel arm standard
- Steel hose covers
- Choice of flails, heads and cutter bars
- Power slew
- Oil cooler standard

Want to know more about the Hawk Evo Power Plus range?

Steel hose covers
Adding additional protection to drive motor houses.

Parallel arm geometry
Available as standard.

Road lights
Fitted as standard.

Hawk Evo Forward

The Hawk Evo Forward arm is perfect for farmers, contractors and municipal environments where the added benefits of a forward arm is required to improve visibility and minimise operator stress and fatigue.

Fitted as standard with the powerful 125 litre drive system, the Hawk Evo Forward will perform on all stages. There is a choice of controls and attachments to suit a wide range of applications.

Key Features

- 5.4m or 6.0m reach
- Heavy duty linkage
- 125 l/min independent system
- 1.2m or 1.5m cutting head
- Non parallel

Want to know more about the Hawk Evo Fwd range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Folding second arm

Hydraulic arm folds to create a narrow width to aid transport.

Heavy duty linkage

Provide maximum stability for larger arm mowers.

Oil cooler

Standard on all models (cable controls as an option).

Hawk Evo VFA

The Hawk Evo VFA (Variable Forward Arm) is perfect for contractors and municipal environments, where the added benefits of a forward arm is required to improve visibility.

With a maximum reach of 6m, the Hawk Evo VFA can cope with every job it is tasked with. The impressive 1.8m maximum travel on the variable forward arm (VFA) gives 1.6m forward working.

Key Features

- 6.0m reach
- Over 1.8m traverse on variable forward arm
- Heavy duty linkage or axle bracket mounted
- 125 l/min independent system

Want to know more about the Hawk Evo VFA range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Transport bracket
Supplied as standard for fast travelling on the road.

Massive 1.6m forward reach
For optimum viewing position when working.

Clear visibility
Variable forward reach brings cutting head into drivers view.

Falcon Evo

The Falcon Evo range has been specifically designed for the large scale contractor.

With high specification options and a range of controls to select from, the Falcon range is the first choice for contractors.

Key Features

- 5.5m, 6.0m or 6.5m reach
- Heavy duty linkage
- 125 l/min independent system
- 1.2m or 1.5m cutting head
- Parallel option

Want to know more about the Falcon Evo range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Pressed steel first arm construction

Strength and weight-saving without compromise.

Oil cooler

Standard on all models (cable controls as an option).

125L and 74HP pumps

Comes as standard, with 137L and 85HP options.

Falcon Evo VFA

The Falcon Evo VFA (Variable Forward Arm) is perfect for contractors and municipal environments, where the added benefits of a forward arm is required to improve visibility.

This flagship model in the VFA range provides an unrivalled 2.1m total travel including 1.8m forward reach, resulting in an optimum mid-mounted cutting head position.

Key Features

- 6.5m reach
- Over 2m traverse on variable forward arm
- Axle bracket mounted only
- 125 l/min independent system

Want to know more about the Falcon Evo VFA range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Arm float cylinder
To aid grass cutting on roadsides.

Forward reach position
Enables mid-mounted head position with simplicity of rear mounted arm.

Parallel linkage
Comes as standard to assist operator control.

Falcon Evo Telescopic VFA

The Falcon Evo Telescopic VFA (Variable Forward Arm) is perfect for contractors and municipal environments, where the added benefits of a forward arm is required to improve visibility.

The Falcon Evo Telescopic VFA provides an unrivalled 2.1m total travel including 1.8m forward reach, resulting in an optimum mid-mounted cutting head position.

Key Features

- 6.5m reach
- Over 2m traverse on variable forward arm
- Axle bracket mounted only
- 125 l/min independent system

Scan the QR code with a smart phone or tablet to instantly view the page.

Telescopic second boom

To give greater reach in those harder to reach areas, all controlled from the in cab controls.

Close in ground cutting

Variable arm technology allows forward and rearward reach, enabling cutting in behind the tractor wheel.

Close in cutting capabilities

To allow cutting in tight spaces and narrow lanes.

Front Mount Range

The Bomford front mount range is designed with local authorities in mind where front mounted operations are required.

There are numerous fitting options on this machine, for tractors, trucks and loading shovels.

Key Features

- 4.9m, 5.4m or 5.8m reach options
- Front mounted
- Low profile design for good forward visibility
- 125 l/min fully independent hydraulic system
- Left and right hand side cutting
- DIN3 plate mounting option
- Tractor front linkage option

Buzzard Evo

The Buzzard Evo range has been specifically designed for the large scale contractor and agency.

With a large choice in specification, and fully proportional controls.

Key Features

- 7.25m or 8m reach
- 1.2m or 1.5m cutting heads
- Oil cooled as standard
- ICS fully proportional controls

Want to know more about the Buzzard Evo range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Telescopic arm
Gives increased flexibility.

Powerful 74hp hydraulics
For continuous use. Twin pumps with separate oil tank.

Oil cooler
Standard on all models (cable controls as an option).

Buzzard Evo Forward

The Buzzard Evo forward range has been specifically designed for the large scale contractor and agency.

With the added advantage of forward reach, give improved visibility for the operator along with a large choice in specification, and fully proportional controls.

Key Features

- 7.25m or 8m reach
- 1.2m or 1.5m cutting heads
- Oil cooled as standard
- ICS fully proportional controls

Want to know more about the Buzzard Evo Fwd range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Impressive reach

3 arm design gives versatile reach characteristics for flexibility around obstacles.

Transport position

Folding 3rd arm allows compact transport position.

Powerful 74hp hydraulics

For continuous use. Twin pumps with separate oil tank.

Buzzard Evo Telescopic VFA

The Buzzard Evo Telescopic VFA (Variable Forward Arm) is perfect for contractors and municipal environments, where the added benefits of a forward arm is required to improve visibility.

This latest flagship model in the VFA range provides an unrivalled 3.2m total travel including 2.1m forward reach, resulting in an optimum mid-mounted cutting head position.

Key Features

- 8.0m reach
- Over 3.2m traverse on variable forward arm
- Axle bracket mounted only
- 125 l/min independent system

B71M B80M

A professional range of machines designed for smaller, lightweight tractors. Requiring only a mass of 4900kg for the tractor, this range of arm mowers really gives the contractor true flexibility.

The 3 arm arrangement gives a versatile reach characteristic, allowing cutting over obstacles such as fences and guard rails.

Key Features

- 7.1m or 8m reach
- 1.2m or 1.5m cutting heads
- Oil cooled as standard
- ICS fully proportional controls

Eagle

The Eagle flail mower features a telescopic outer arm, giving it a maximum reach of 8.0 metres and the whole arm is mounted on a kingpost so that it can be slewed through 180 degrees for double sided, left or right-hand cutting.

The Eagle can be specified with either a gear or a piston system, and features wraparound steel hoses on the first arm and kingpost for durability and improved hose routing, along with weight saving.

Key Features

- 8m reach
- Left and right handed cutting
- 137 l/min independent hydraulic system
- 1.2m, 1.5m or 2m cutting head

Steel hoses

Improves hose routing and aids cooling.

Heavy duty twin ram slew system

Includes hydraulic breakout to protect machine operator.

Worm drive slew

New turntable design allows precise control of cutting head.

Turbo Mower

The Turbo Mower Elite, Euro and Turbo Pro range offers operators a huge choice of cutting widths at very cost effective prices.

A well designed and constructed range, the Turbo Mower is built with durability and ease-of-use in mind – a low maintenance machine that is simple to operate.

Key Features

- Choice of cutting widths available
- Front mount options
- Hydraulic offset standard on all models
- Standard fitted roller and side skids
- Cat 11 three point linkage mounted
- Over run clutch protected

Simple belt tensioning system with oil filled drive tube.

Flail type

Heavy duty whale tail type flail fitted as standard.

Turbo Mower Offset

The Turbo Mower Offset range offers operators a choice of cutting widths at cost effective prices.

A well designed and constructed range, the Turbo Mower Offset is built with durability and ease-of-use in mind – a low maintenance machine that is simple to operate.

Key Features

- 1.6m, 2.0m, 2.25m and 2.5m cutting widths
- Three point linkage mounting
- PTO overrun protection, safety breakaway and double-skin protection
- 155 degrees of head movement
- Vertical and horizontal hydraulic adjustment
- Fuel-efficient, high-performance double spiral rotor
- Cutting height of 30mm - 80mm
- Maximum cutting diameter of 50mm

Raptor

The new Raptor verge mower is the ideal choice for users who have a dedicated shoulder mowing operation to perform.

The Raptor can be front mounted allowing the fitting of a Bomford arm mower on the rear giving a 3.5m cut, in one pass. The Raptor can effortlessly work around street furniture and varying ground levels.

Key Features

- Cutting widths of 1.2, 1.6 or 2.0m.
- Front or rear mounted options
- Banks cutting between 90° up and 50° down
- Cat 11 three point linkage

Twin-Blade

The new, more robust Twin-Blade is a flexible, efficient, in-line topper or fully offset - perfect for paddocks and headlands.

The range extends from 1.25m and semi-offset to 2.8m, along with a fully offset 2.4m. The Twin-Blade also features cast-iron gearboxes and protected drivelines. Simple, adjustable skids on this machine are key to a smooth operation.

Key Features

- Shaft driven
- 1.25m, 1.45m, 1.85m, 2.4m, 2.4m offset and 2.8m cutting width
- Variable cutting height
- Shearbolt and overrun gear box protection
- Cat 1 or Cat 11 three point linkage
- A-Frame mounting option

Twin-Blade HD

The Twin-Blade HD is a rugged topper available in 8' or 9' cutting widths. The HD has the standard features of both adjustable depth skids, and the adjustable castor wheels to control cutting height.

The HD model is constructed with a 4mm Domex steel and a main input gearbox capable of 150HP, and fitted as standard with a durable slip clutch PTO shaft. There are a number of blade options available, from standard grass blades, dome anti scalp kit, and shredder blades.

Key Features

- Shaft driven
- 2.4m and 2.7m cutting width
- Adjustable depth skids and adjustable castor wheels
- Variable cutting height
- 4mm Domex steel construction
- Various blade options available
- Cat 11 three point linkage

Tri-Blade

The Tri-Blade topper is of robust design and has three sets of newly designed, heavy duty timed blades for stripe free cutting.

With an adjustable cutting height of between 25mm (1") and 333mm (10") the Bomford Tri-Blade offers superb versatility.

Direct driven blades through 1000rpm independent gearboxes and rubber PTO shaft couplings protects against debris impact. Slip clutch protection on the PTO shaft ensures long life of the independent gearboxes.

Key Features

- 2.75m cutting width
- 3.0m transport width
- Variable cutting height
- Three sets of timed blades
- Slip clutch protection
- Front and rear heavy duty chain guards
- Cat 11 three point linkage
- 1000 rpm gearbox driven

Tri-Wing

A flex mower specifically designed for large open spaces, with wide-angle constant velocity drive shafts and in-line slip clutch protection.

The clean lines of this robust design, reduces the build up cut debris from collecting and rotting the machine deck, maximising it's working life.

Fitted with six 200/60 - 14.5 10 ply tyres as standard, the Tri-Wing 4.6 and 6m can also be also supplied with an eight wheel option for reduced ground pressure. The hydro-suspension shock absorbing mechanism ensures a smooth ride and reduces stress within the mainframe.

Key Features

- 4.6m and 6m cutting widths
- Walking wheel kit option
- Nine heavy duty updraft blades
- Choice of 5 blade configurations
- Shredder option for maize
- Hydro-suspension system
- Hydraulic level lift system

Want to know more about the Tri-Wing range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Road lights

High speed road lighting and licence plate brackets.

Axle options

Walking axle options for contour following operation.

Contoured decks

Allows quick cleaning of cut material from deck surface.

Product Specification

Weight (Approx)	2385kg / 5258lbs	2775kg / 6117lbs

Easy to transport

Simple single operation to fold and travel, with additional locking pins for road transit.

Wide coverage

4.6m and 6.0m models allow wide cutting passes to tackle large open areas quickly.

FORESTRY

Mulchers & Excavators

A range of robust, simple and effective forestry equipment. Our mulchers come with a choice of hammers and are available tractor mounted or excavator mounted.

The Bomford Turner range of robust and effective mulchers offers real versatility with 2 ranges, standard duty (SD) swinging hammer and heavy duty (HDX) with fixed hammers. Capable of clearing and mulching wood up to 200mm diameter (8") on the Buccaneer HDX models, large areas can be cut, mulched and cleared in a single operation.

Want to know more about our Forestry range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Forestry Range

Buccaneer
Hurricane

72
74

Buccaneer

Suitable for use with tractors of between 110hp to 120hp and features a heavy duty gearbox. The robust build means that the smaller SD machine weighs 1,260kg while the wider HDX model comes in at 2,150kg.

The standard specification of the new Bomford Buccaneer HDX includes a front double-row chain guard, Cat 11/111 three-point linkage and heavy-duty replaceable skids. A front mounted version of the Buccaneer HDX is also available.

Key Features

- Fixed or swinging flail options
- 5 belt driven (8 on HDX model)
- 110-120hp tractor requirement options
- Rear pushbar standard on both models
- Replaceable skids
- 540rpm or 1,000rpm

Want to know more about the Buccaneer range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Heavy duty drive

5 belt drive on SD models and 8 belts (dual drive) on HDX ranges.

Swinging hammer options

Ideal for use on green vegetation for shredding.

Protection

Double rows of heavy chains and adjustable skids.

Fixed hammers

Options available. Suitable for managing wooded areas and providing a chipped wood finish. Benefits are mulching the debris within the soil leaving the ground level.

Push bars

Rear push bars fitted as standard enable material to be pushed over and presented to the cutting rotor. Hydraulic rear hood for closing down rear opening for mulching.

Hurricane

A semi forestry mower fitted with chains or blades and suitable for all types of clearance applications.

A well designed and constructed range, the Hurricane is built with durability and ease-of-use in mind, fitted with high quality Grade 80 chains and adjustable skids.

The Grade 80 chain is a heat-treated steel chain with a high strength-to-weight ratio. Its strength makes it safe for overhead lifting and lifting slings. It is also excellent for recovery, safety, and towing chains.

Key Features

- 10mm top deck with reinforcement strengthening supports
- 540 RPM c/w slip clutch as standard
- Simple height adjustment
- Adjustable skid height from 50 – 100mm
- Heavy duty lifting chains
- 18 mm chain size
- Cat 11 linkage
- Heavy duty gearbox 140 hp

Want to know more about the Hurricane range?

Scan the QR code with a smart phone or tablet to instantly view the page.

3 Heavy duty cutting chains
3 Chains per rotor in Grade 80 steel to work in stony conditions.

Adjustable skid height
From 50 – 100mm.

Protection
Heavy duty chain guard protection.

Heavy duty topper

Suitable for cutting rough terrain and wooded areas.

REMOTE

Wirelessly Operated

Remote controlled flail mowers offer fast, effective and safe vegetation control on steep, remote and challenging terrains.

The wide variety of attachments available for this range - which include dozer blades, sweepers, loaders, snow blowers and rakes - offer an extremely versatile remote controlled solution.

Remote Range

Flailbot Mini	78
Flailbot Compact T4F	80
Flailbot Original T4F	82
Flailbot Supreme T4F	84

Flailbot Mini

The smallest of the Flailbot range, but packed with all the innovative features of the larger models. Easy access to site, with a lower gross weight and smaller foot print.

With a punchy 25hp engine, whilst it appears to be small, the Flailbot Mini model is very capable. Cutting head size is 1000mm (32 3/4") and this makes this model perfect for small access sites, and to be transported on smaller vehicles between sites.

Key Features

- 2 cylinder Honda petrol engine
- 17 litre (4.5 USG) fuel capacity
- Closed circuit piston pump cutting circuit
- 40 degree working angle
- Hydrostatic transmission

Want to know more about the Flailbot Mini?

Scan the QR code with a smart phone or tablet to instantly view the page.

Sleek low design

Giving maximum accessibility to difficult areas whilst remaining well protected with full engine covers.

Integral rollbar

Standard on all Flailbot models, and offers the additional feature of lift points.

Hydraulic front hood

Operational via controls with electronic interlock for safety dependent on rotor direction.

Flailbot Compact T4F

Flailbot Compact T4F carries all the same features as the Mini model, with the bigger Flailbot 50hp Perkins industrial powerplant.

The compact size, but powerful 50hp Perkins engine makes the compact model a contractors first choice. With the added feature of manual wind out track width as standard, and a number of attachments available.

Key Features

- Perkins 50hp industrial engine
- 1300mm (51") cutting head
- Manually wind out track frame
- Auto hydraulic track tension system
- Full engine covers as standard

Working range
All Flailbot models have an impressive working range of 150m (492').

Flailbot Original T4F

Flailbot Original T4F continues to draw from the success of its predecessor, with the heritage of being the market leading diesel-powered slope mower.

The original Flailbot, now updated to 50hp, designed for challenging terrains with the powerful industrial Perkins diesel engine fitted as standard, providing the ultimate in power to weight performance in the remote controlled tracked tool carrier market.

Key Features

- 3 Cylinder 50hp T4F Perkins engine
- 29 litre (8 USG) fuel tank capacity
- Closed circuit tandem piston pump with variable displacement
- 150m (492') working range
- 55 degree max working angle

Want to know more about the Flailbot Original T4F?

Scan the QR code with a smart phone or tablet to instantly view the page.

Excellent grip characteristics

Individual tracks can be extended by up to 250mm (10").

Perkins engine accessibility

Removable steel engine panels for easy access.

Precise control

The remote control, operating all Flailbot functions has a range of 150m (492').

Flailbot Supreme T4F

The flagship model – enjoy ultimate horse power with the 75hp engine giving maximum power and control to the operators finger tips.

Fitted with a tier 4 Final Perkins engine, producing over 200 NM of torque making the Flailbot Supreme the most powerful model in the range. The Supreme is fitted as standard with hydraulic adjustable track width and auto track tension system.

Key Features

- 4 Cylinder 75hp T4F Perkins engine
- Tier 4 final engine emissions
- Hydraulically adjustable track frame
- 39 litre (10 USG) fuel tank capacity
- 150m (492') working range

CULTIVATION

Agricultural Cultivators

A range of low cost surface cultivators, ranging from 2.0m to 5.0m working widths. 3 point linkage mounted and surface driven.

Bomford Turner have a history of producing quality simple cultivators. The goal has always remained the same; simple, low maintenance and cost effective. Our Dyna-Drive ground-driven cultivator meets each of these goals and is offered in a range of working widths.

Want to know more about our Cultivation range?

Scan the QR code with a smart phone or tablet to instantly view the page.

Cultivation Range

Dyna-Drive

88

Dyna-Drive

Simple and effective ground driven cultivator, for use on all types of soil at high speed.

Designed in conjunction with the NIAE, the Dyna-Drive enables successive cereal crops to be sown at reduced costs and in faster times than with traditional methods of cultivation.

Low running costs as a result of no PTO drive. This reduces power requirement so forward speed is not restricted, so large areas can be covered quickly. Average forward speed of 12 km/hr and then typically outputs of 3.13 ha/hr up to 6.0 ha/hr can be achieved dependent upon soil type.*

Key Features

- 1.6, 2.0, 2.6, 3.0, 4.0 or 5.0m widths
- 4.5 and 6.5m Flex options also available
- Maintenance free drive system
- Breaks up stubble, breaks down ploughing
- No PTO required
- Crumbler or Packer roller options
- Specialist vineyard option available

*Based on 5m working width

Dual rotors

Two rotors connected via a single drive.

Front rotor

Tines lift soil and turn into rear rotor to break down soil structure.

Vineyard 1.6m option

A kit is available for restricted and narrow working areas such as orchards and vineyards.

Crumbler roller

Break down soil clods to give a fine finish ready for drilling.

Packer roller

Consolidate and break down soil to reduce soil erosion.

Dyna-Drive Flex

Giving greater versatility and output with working widths up to 6.5m

ACCESSORIES & BOLT-ONS

Fittings & Controls

There are a wide range of fittings and controls to complement your Bomford Turner machine.

Cutting heads range from 950mm to 2m with a choice of flails to suit every application while the many different attachments provide versatile working solutions. Meanwhile, our range of easy-to-use control options offers something for every budget.

Want to know more about our range of Accessories & Bolt-Ons?

Fittings & Controls

Heads	92
Attachments	94
Flails	96
Tractor Fittings	98
Controls	100

Heads

Flail head fitting is dependent on the model purchased, with a choice available on most.

The range starts with 950mm cutting width and rises to a full 2m. Most heads offer a choice of 7 flails and the ability to adjust the rotor speed to suit verge or hedge.

Key Features & Options

Hydraulic Roller

Hydraulic Rollers enable the operator to raise the roller to a higher position, remotely from inside the cab when cutting hedge.

Available on **Pro-Trim** and **Pro-Cut**

Double Helix Shaft

Double helix shaft technology (a Bomford innovation) delivers up to 45% overlap of the flails, belt driven protection against unseen debris and close-in cutting.

Available on **Pro-Trim** and **Pro-Cut**

Variable Track Brackets

The new VTB has been designed for operators who need to work in restrictive areas such as narrow lanes - perfect for getting up close and personal to hedges on rural roads and country estates.

Want to know more about our range of Heads?

Scan the QR code with a smart phone or tablet to instantly view the page.

ISMP

The ISMP head enables the whole shaft assembly to be changed saving considerable down time when different flails are required for different jobs. Pro-Trim, Pro-Cut and ISMP heads are equipped with 'Anti Wrap' bearings to reduce the risk of debris fouling the all important rotor bearings.

Available on **Pro-Trim** and **Pro-Cut**

Belt vs Direct Drive

The belt housing on belt driven heads is typically 75mm narrower than the end drive motors enabling the head to get closer in to the hedge or fence. Belt drives offer shock protection when the rotor hits an obstacle where direct shaft driven end drive can shear, resulting in expensive repairs and prolonged down time.

950 LW

The 950 LW head is lighter weight for smaller machines. Direct driven from an end drive motor reducing the overall weight as there is no need for belts and pulleys.

Head Weight	140kg 309lbs
Compatible with	
Raven (74 Litres)	
Kestrel E (74 Litres)	

1107 MW

The 1107 MW heads are of medium weight but with all the advantages that belt drive gives, close-in cutting and damage limitation from unseen obstacles.

Head Weight	145 - 170kg 309 - 375lbs
Compatible with	
Raven (74 Litres)	
Kestrel E (74 Litres)	

1257 LW

The 1257 LW head is lighter weight for smaller machines. Direct driven from an end drive motor reducing the overall weight as there is no need for belts and pulleys.

Head Weight	145 - 170kg 309 - 375lbs
Compatible with	
Robin (50 Litres)	Kestrel E (74 Litres)
Raven (74 Litres)	

Pro-Trim 1.2

The Pro-Trim 1.2 offers double helix shaft technology, belt driven protection and interchangeable shaft operations for speedy flail changes.

Head Weight	240 - 260kg 529 - 573lbs
Compatible with	
Kestrel E (74 Litres)	Hawk (104 Litres)
Kestrel S (88 Litres)	

Pro-Trim 1.5

The Pro-Trim 1.5 offers double helix shaft technology, belt driven protection and interchangeable shaft operations for speedy flail changes.

Head Weight	260 - 300kg 573 - 661lbs
Compatible with	
Hawk (104 Litres)	

Pro-Trim ISMP 1.2

The Pro-Trim ISMP 1.2 has all the features of the Pro-Trim 1.2 but with the addition of ISMP which allows the entire shaft assembly to be changed out saving down time.

Head Weight	240 - 260kg 529 - 573lbs
Compatible with	
Hawk (104 Litres)	

Pro-Cut 1.2

The Pro-Cut 1.2 is made of Domex steel offering double helix shaft technology, belt driven protection and interchangeable shaft operations for speedy flail changes.

Head Weight	280 - 300kg 617 - 661lbs
Compatible with	
Falcon (125 Litres)	B80M (125 Litres)
Buzzard (125 Litres)	B81.81 (125 Litres)
B71 (125 Litres)	Eagle (137 Litres)

Pro-Cut 1.5

The Pro-Cut 1.5 is made of Domex steel offering double helix shaft technology, belt driven protection and interchangeable shaft operations for speedy flail changes.

Head Weight	300 - 340kg 661 - 750lbs
Compatible with	
Falcon (125 Litres)	B80M (125 Litres)
Buzzard (125 Litres)	B81.81 (125 Litres)
B71 (125 Litres)	Eagle (137 Litres)

Pro-Cut ISMP 1.2

The Pro-Cut ISMP 1.2 has all the features of the Pro-Cut 1.2 but with the addition of ISMP which allows the entire shaft assembly to be changed out saving down time.

Head Weight	320 - 350kg 705 - 772lbs
Compatible with	
Falcon (125 Litres)	B80M (125 Litres)
Buzzard (125 Litres)	B81.81 (125 Litres)
B71 (125 Litres)	Eagle (137 Litres)

2m HD Head

The 2m HD head offers the widest cutting width on the market, heavy duty build fitted with an MP44 flail and 150 roller.

Head Weight	450 - 500kg 992 - 1102lbs
Compatible with	
Falcon (125 Litres)	
Buzzard (125 Litres)	

Choosing the right Head

Selecting the right head can seem like a difficult choice given the many options available.

Points to consider include:

- Compatibility with your arm mower
- Frequency of operation
- Grass or hedge cutting

For further information please speak to one of our experienced team.

Attachments

A wide selection of attachments is available to improve the versatility and therefore the profitability of the Bomford arm mowers range.

Bomford attachments are built with the same attention to detail and robust qualities that you have come to expect from the Bomford machinery range.

Key Features

- Simple square section mounting
- Simple hydraulic connection
- Vast choice of attachments to maximise usage from your arm mower

Want to know more about our range of Attachments?

Scan the QR code with a smart phone or tablet to instantly view the page.

Rotary Heads

Ideal for longer growth material. Available with blades or heavy-duty chain cutting options, operating in either vertical or horizontal plane, its 2.25msq cutting area makes short work of even the most challenging tasks.

Head Weight	380 - 450kg 838 - 992lbs
Compatible with	
Falcon (125 Litres)	Buzzard (125 Litres)

Weed Brush

Removes wild herbs and weeds on open cycling paths, pavements and road verges. The debris is moved to the side as the head travels forward.

Head Weight	145 - 170kg 320 - 375lbs
Compatible with	
Kestrel S (88 Litres)	Buzzard (125 Litres)
Hawk (104 Litres)	Eagle (137 Litres)
Falcon (125 Litres)	

Pro-Saw

With widths of 1.5m (3 blade), 2.0m and 2.5m (4 blade), the Pro-Saw is capable of cutting through branches of up to 20cm (8").

Head Weight	145 - 170kg 320 - 375lbs
Compatible with	
Raven (74 Litres)	Falcon (125 Litres)
Kestrel E (74 Litres)	Buzzard (125 Litres)
Kestrel S (88 Litres)	Eagle (137 Litres)
Hawk (104 Litres)	

Ditch Cleaner

Designed for use with a range of side-arm mowers, simplifying the maintenance of roadside ditches and grips. Two models are available, manual or hydraulic.

Head Weight	240 - 260kg 529 - 573lbs
Compatible with	
Hawk (104 Litres)	Eagle (137 Litres)
Falcon (125 Litres)	
Buzzard (125 Litres)	

Heavy Sheartrim

For cutting material up to 100mm (4").

Head Weight	250-280kg 551 - 617lbs
Compatible with	
Kestrel E (74 Litres)	Falcon (125 Litres)
Kestrel S (88 Litres)	Buzzard (125 Litres)
Hawk (104 Litres)	Eagle (137 Litres)

Debris Blower

Controlled from within the cab and driven by its own hydraulic motor, the fully adjustable Debris Blower effortlessly removes hedge and verge trimmings from the roadside.

Attachment Weight	80kg 176lbs
Compatible with	
Kestrel E (74 Litres)	Falcon (125 Litres)
Kestrel S (88 Litres)	Buzzard (125 Litres)
Hawk (104 Litres)	

Medium Sheartrim

For cutting material up to 40mm (1 1/2").

Head Weight	240 - 260kg 529 - 573lbs
Compatible with	
Raven (74 Litres)	Falcon (125 Litres)
Kestrel E (74 Litres)	Buzzard (125 Litres)
Kestrel S (88 Litres)	Eagle (137 Litres)
Hawk (104 Litres)	

Collector Head

Ingenious design combining a conventional flail head and rotor, along with a twin helical auger collecting flail cuttings. Suction hose and vacuum trail can be fitted (not included).

Head Weight	420kg 926lbs
Compatible with	
Falcon (125 Litres)	

Sheartrims

Reciprocating cutter bars for cutting material in enclosed areas where the cut material needs to be controlled. A range of sizes are available.

Standard Sheartrim

For cutting material up to 25mm (1").

Head Weight	180-240kg 397 - 529lbs
Compatible with	
Raven (74 Litres)	Falcon (125 Litres)
Kestrel E (74 Litres)	Buzzard (125 Litres)
Kestrel S (88 Litres)	Eagle (137 Litres)
Hawk (104 Litres)	

Hydraulic Roller

Easy roller adjustment without leaving the cab. A simple tractor spool operated twin ram system allows adjustment during continuous work on either grass or hedge cutting.

Attachment Weight	280-380kg 617 - 838lbs
Compatible with	
Pro-Trim 1.2	Pro-Cut 1.2
Pro-Trim 1.5	Pro-Cut 1.5

Choosing the right Attachment

Selecting the right attachment can seem like a difficult choice given the many options available.

Points to consider include:

- Compatibility with your arm mower
- Style/type of operation looking to perform
- Available budget

For further information please speak to one of our experienced team.

Flails

Over the decades we have designed, adapted and invented a range of flails for our cutting heads to suit every purpose.

The vast majority of our heads now offer the ability to fit any one of these ten flails. Some are available as standard and some are optional. The rotors in our flail heads have a twin helical pattern, giving a wider flail overlap than previous models and our competitors, ensuring a cleaner, more complete cut.

Choosing the right Flail

Selecting the right flail can seem like a difficult choice given the many options available. All of our flails will fit onto the same rotor apart from the Bushmaster which requires a heavier duty rotor because of the weight. Points to consider include:

- Frequency of cut
- Material to cut – grass, hedges or a combination of both

Flail layouts

All our flails are mounted in a helical pattern around the cutting rotor. The choice of flails for intended purpose and number are dictated by the size and model of the head they are intended for.

For further information please speak to one of our experienced team.

Flail Compatibility Options

BB Flail 40mm

Narrow profiles and sharp cutting edges give a clean cut with low power consumption.

MP44 Multi Purpose Bootee Flail

Dual purpose flail cuts material up to 30mm (1 1/2").

HS60 Bootee Flail

Dual purpose flail will cut up to 35mm (1 1/2"). Interchangeable with the 'T' Flail 60mm.

Pro Flail 40mm

Multi-purpose flail for annual hedge trimming and vegetation control.

T Flail 40mm

Dual purpose flail will cut material up to 30mm (1 1/2").

T Flail 60mm

Create an excellent finish on hedges from six months growth to 50mm (2") thick. Interchangeable with the HS60 Bootee Flail.

True-Cut

More pronounced leading edge on the shaft removes unwanted build-up of material and allows more efficient cutting.

Match Cut 60mm

Suitable for heavy growth, this flail produces the cleanest cut on all types of material.

Bushmaster Open

A heavy-duty (open) flail for cutting growth up to 100mm (4") it is perfect for three year hedge growth or brush cutting.

Bushmaster Closed

A heavy-duty (closed) flail for cutting growth up to 100mm (4") it is perfect for three year hedge growth or brush cutting.

Tractor Fittings

All Bomford hedge cutters attach to the tractor using 1 or 2 styles of mounting systems.

System 1

Three point linkage kits that allow quick and easy attachment to the tractor using the standard three point mounting and machine support frame. There are 4 types of three point mounting kits:

- Chain Stabiliser Kit
- A Frame
- Three Point Linkage
- Four Point Linkage
- Heavy Duty Linkage

System 2

Axle brackets allow rigid mounting of the machine to the tractor with no sway or movement between tractor and machine. The axle brackets are attached to the underside of the tractor's rear axle.

- Axle Bracket
- Subframe

Want to know more about our range of Tractor Fittings?

SYSTEM 1: Chain Stabiliser Kit

A simple and cost-effective solution. Fitted using "key hole" plates on the top link and lower link pins, the working height is selected on the tractor hydraulics, chains are slotted through the key hole plates and become tight and control lateral stability when weight is lowered.

Compatible with:
Raven, Kestrel E, Osprey

SYSTEM 1: A Frame

A fixed mounting fitted to the tractor's top link clevis, this is a simple and secure way of linking various attachments. The frame can be bolted to the machine using one of the series of attachment holes and check chains tightened to prevent sideways movement.

Compatible with:
Microklippa, Robin

SYSTEM 1: Three Point Linkage

This popular type of mounting frame is fitted to the machine before fitting to the tractor and is compatible with a wide range of tractor makes and models. The tractor's 3-point linkage is then attached to the machine and the mounting frame for secure linkage with check chains tightened to prevent sideways movement.

Compatible with:
Osprey, Kestrel, Hawk

SYSTEM 1: Four Point Linkage

This mounting frame uses the conventional 3-point linkage but also connects to the tractor's pick-up hitch to create additional stability and rigidity when working.

Compatible with:
Kestrel S, Hawk, Falcon

SYSTEM 1: Heavy Duty Linkage

Heavy duty three-point linkages provide maximum stability for larger arm mowers. This linkage is suitable for Cat 11 and Cat 111, and for machines up to 6.5m reach. It can also be used in conjunction with a tractor's Euro type hitch.

Compatible with:
Hawk 6.5T, Falcon

SYSTEM 2: Axle Bracket

Axle brackets are incorporated, where necessary, with stabiliser and cab suspension mounting positions and allow rigid mounting of the machine to the tractor with no sway or movement.

Compatible with:
Hawk, Falcon, Buzzard, B81-81, B71M, Eagle

SYSTEM 2: Subframe

On Kestrel S, Hawk and Falcon machines, the sub-frame and axle brackets may be specified as an alternative to the three-point mounting system while on all Buzzard and Eagle machines axle mount is standard.

Compatible with:
Hawk, Falcon, Buzzard, B81-81, B71M, Eagle

Choosing the right Fittings

Points to consider when choosing the right fitting include:

- Compatibility of machine to tractor
- Length of reach on the arm mower being fitted (we generally recommend axle brackets for over 6.5m arms)
- Frequency that machine will be removed from tractor

For further information please speak to one of our experienced team.

Controls

With a focus on ease of operation, our control options provide a suitable solution to accommodate your personal requirements and suit various budgets.

Control options range from the simple, much-used cable control through to the fully adjustable ICS Intelligent Control System that can be programmed/personalised by the operator.

Key Features

- Simple mounting systems
- Easy operation
- Full instruction manuals

ICS 4 - Intelligent Control System

With the added functionality of a colour TFT screen, with larger viewing area, upgraded menus and fault diagnostics, along with arm mower speed adjustment system, the finger tip proportional joystick gives smooth and agile control to the operator.

EPP 4 - Electronic Proportional

Now in its 4th generation, it shares the robust control box housing of the ICS controls. The ultimate in electronic controls, fitting well on all models in the range. It is a firm favourite with farmers and contractors.

LPH - Low Pressure Hydraulics

A robust proportional alternative. With a larger control joystick, it is well suited to machines with multiple occasional users, or for someone upgrading to their first joystick control. Simple operation, and easy to use.

EPC - Electronic Proportional

A proportional control option for the smaller compact range. Professional operation with fingertip controls, but in a compact sized housing, making mounting to smaller compact tractors simpler.

CC - Low Friction Cable Controls

The original remote cable control. Using a series of low friction cable controls in conjunction with a remote hydraulic valve. A simple lever arrangement gives individual control of each hydraulic ram cylinder.

Choosing the right Controls

Points to consider when choosing the right control include:

- Budget – cost of control upgrade
- Ease of use over long periods of time
- Mounting positions in cab

Service & Support

Should you require any assistance with operation or repair our service and support team are on hand to help.

Technology experts

Bomford service engineers are experts in our technology. Backed by extensive training and a fully-equipped mobile workshop, they provide an unrivalled level of product knowledge and back-up, to deliver fast and effective cover across the country.

World class sales support

We can offer specialist advice direct from the manufacturer, one-to-one consultations with experienced sales professionals and expert guidance on creating new machines to precise personal specifications.

Conditions of sale

Prices and specification are subject to change without notice.
All goods will be invoiced at price ruling at the date of dispatch.
Prices quoted in the price list do not include VAT.

The buyer will bring to the attention of those who use the goods all instructions provided by the seller on their use (including all safety precautions to be taken) and will ensure that they have the necessary skills and understanding in respect of their use. Save the extent otherwise provided in section 2 of the unfair contract terms act; the buyer will protect the seller against any failure by the buyer to carry out this obligation.

While every effort has been made to ensure the accuracy of the information at the time of printing, Bomford Turner accepts no liability due to any errors or omissions present in this literature. Bomford Turner reserves the right to make any changes to product specification outside any of those listed in this price list.
